## CSS Best Practices: One-day workshop with Jim Royal

### The CSS Revolution Has Arrived

Cascading Style Sheets (CSS) have become the best way to design web pages quickly and affordably. Join presenter Jim Royal as he shows you how to use CSS to build better web sites for better manageability. He'll show you practical ways to save time and money.

### Highlights

This full-day, hands-on workshop will provide everything you need to get fluent with CSS typography and CSS-based page layout.

- Learn how to write CSS-based web pages efficiently and quickly.
- Discover how CSS can manage the typography of your web pages with simplicity.
- Build web page layouts only with CSS — look Ma, no tables!
- Get hands-on training in writing structured HTML code.
- Practice your skills during the workshop at your own workstation.

A personal copy of the O'Reilly book "CSS Pocket Reference, Second Edition" and all exercise material on CD-ROM are included.

The presentation is offered in English. Basic understanding of HTML is a prerequisite.

### Who Should Attend?

Web page editing is quickly becoming a must-have skill for people in companies of any size. Marketing people, technical writers, administrative staff, and secretaries are all being called upon to work on corporate web sites and intranets.

"CSS Best Practices" is for anyone who needs to work with HTML. Experience with any particular web page editor is not required. If you want to build great web sites that are easy to maintain and save money over the long run, this is the workshop for you!

### Price

Special discount available for members of the Society for Technical Communication.

Prices are in Canadian dollars and include all applicable taxes.

Registration price includes refreshments, but not lunch.
